DRINKING WATER WEEK

1 Grab a grown-up to help you cut around the outside of your raindrop.

2 With your grown-up’s help, cut out the center of your raindrop.

3 Put a piece of contact paper on one side of the raindrop you cut out.

4 Cover the sticky side of the contact paper with your tissue paper squares to create a “stained glass” raindrop.

5 Place a second piece of contact paper on the other side of the raindrop (on top of the tissue paper) to seal your stained-glass raindrop, and voilà!
